KAĞAN KURUBAŞ

Computer Engineer · Backend & AI Integration

Bursa, Türkiye · nurikagankurubas@gmail.com
kagankurubas.github.io · github.com/kagankurubas · linkedin.com/in/kagankurubas

PROFILE

Computer Engineer specializing in backend systems and AI integration. Built Plugvan, an open-source Model Context Protocol server that lets AI assistants operate on the Todoist API through validated, tested tools. Also ships full-stack products such as BookShelf, with a Supabase backend and AI-assisted features.

TECHNICAL SKILLS

Languages	Python · JavaScript / TypeScript · C# · Dart · C++
Development	FastAPI · MCP / FastMCP · Pydantic · Supabase · Gemini API
Architecture	REST APIs · Row-Level Security · Input Validation
Testing & Tools	Pytest · Docker · CI/CD · Git · GitHub

SELECTED ENGINEERING PROJECTS

Plugvan — Open-Source MCP Server github.com/kagankurubas/plugvan

Python · MCP · FastMCP · Pydantic · Pytest · GitHub Actions

- Built an MCP server in Python (FastMCP) that exposes 20+ Todoist tools to AI assistants, with strict Pydantic input validation and documented API limits.
- Designed safe name resolution: tools never silently fall back to a default project or the first match; ambiguous or missing names return explicit results, destructive operations accept only exact names or IDs, and API failures are never reported as “not found”.
- Engineered for trust: hermetic pytest suite (network blocked, no real credentials), GitHub Actions matrix across Python 3.10 to 3.14 on Linux and Windows, a tool-surface snapshot guarding the MCP interface, and a strict message catalog for English/Turkish output.

BookShelf — Personal Library & Reading Companion

React · Supabase (Postgres, Auth, RLS) · Gemini API · CI/CD · Docker

- Designed a Supabase backend (Postgres, Auth, Row-Level Security) and an AI reading-assistant chat powered by the Gemini API via Edge Functions.
- Shipped v1.1 with bilingual (TR/EN) support, automated tests and a CI/CD pipeline.

ZombieBarricadeIdle — 2D Idle Game

Unity · C# · 2D · Idle Systems

Co-developing a 2D idle game in Unity and C# with a two-person team, after moving the pipeline from an initial 3D prototype to 2D.

PROFESSIONAL EXPERIENCE

Independent Software Projects — Self-directed Jun 2026 – Present · Remote

Designing, building and shipping personal software products: Plugvan (open-source MCP server), BookShelf (React/Supabase app) and ZombieBarricadeIdle (Unity idle game).

Sales Representative — Zuhal Müzik May 2024 – Nov 2025 · Balıkesir, Türkiye

Provided technical product guidance across professional and consumer audio/music equipment.

Game Developer — Shawty Games Jul 2023 – Feb 2024 · Remote

Progressed from Game Developer Intern to Game Developer. Contributed to four Unity/C# mobile titles released on Google Play (US market): gameplay implementation, testing, and debugging.

Customer Service Supervisor — Teleperformance Sep 2020 – Sep 2022 · Balıkesir, Türkiye

Progressed from Customer Interaction Specialist to Supervisor; team coordination, escalations, and operational problem solving.

EDUCATION & ADDITIONAL INFORMATION

Education	B.Sc. in Computer Engineering — Balıkesir University | 2017 – 2023
Languages	Turkish (Native), English (B2)
Military Service	Compulsory service completed (Dec 2025 – Jun 2026)
